PROFESSIONAL SUMMARY

Results-oriented Full-Stack & Cloud Software Engineer with 3+ years of experience engineering scalable, cloud-native solutions and event-driven backends for mission-critical enterprise aviation platforms at British Airways (TCS). Proficient in developing resilient RESTful microservices and serverless architectures using Java (Spring Boot), Python, and modern JavaScript/Web APIs, tightly integrated with core AWS services (ECS Fargate, Lambda, API Gateway, S3). Experienced in event streaming with Kafka, SQS, and IBM MQ, automated CI/CD workflows, and infrastructure as code (Terraform). AWS Certified AI Practitioner with proven expertise leveraging AI-assisted development tools and cloud AI services to deliver high-performance, secure software.

TECHNICAL SKILLS

- Languages & Core Tech: Java (Spring Boot, RESTful APIs, OOP), Python (Boto3, FastAPI), JavaScript (ES6+, DOM, REST Integration), HTML5, CSS3, SQL, Shell Scripting (Bash)
- Cloud & Serverless (AWS): Lambda, ECS Fargate, API Gateway, EC2, S3, IAM, KMS, EventBridge, CloudWatch, DynamoDB, Amazon Bedrock, SageMaker
- DevOps, IaC & Automation: Terraform, Docker, GitHub Actions, GitLab CI/CD, Git, Linux, Postman
- Messaging & Distributed Systems: Apache Kafka (Amazon MSK), AWS SQS, Dead Letter Queues (DLQ), IBM MQ, Event-Driven Architecture
- Databases & Data Stores: PostgreSQL, Amazon Aurora, Amazon RDS, DynamoDB, Redis / MemoryDB, SQL Optimization & Schema Design
- Observability & Code Quality: CloudWatch (Logs, Metrics, Alarms), Datadog, Pytest, JMeter, Ruff, SonarQube quality gates
- AI & Developer Tooling: Amazon Q Developer, Claude, GitHub Copilot, Model Context Protocol (MCP) concepts, Prompt Engineering

PROFESSIONAL EXPERIENCE

TCS – BRITISH AIRWAYS, Chennai, India

Cloud Software & Reliability Engineer | Sept 2023 – Present

- Cloud-Native Backend & Microservices: Designed, deployed, and maintained scalable RESTful microservices and serverless applications across AWS Lambda, ECS Fargate, and API Gateway, supporting three tier-1 airline systems migrated from legacy platforms to AWS.
- Full-Stack Feature Delivery & API Integration: Built API contracts and integrated modular backend endpoints with web-based operational dashboards using JavaScript, HTML5/CSS, and REST APIs, ensuring intuitive data visualization and operational controls for flight data operators.
- Event-Driven Messaging & Data Integrity: Architected and sustained distributed message ingestion pipelines using Apache Kafka (Amazon MSK), AWS SQS, and IBM MQ; diagnosed message bottlenecks, payload schema mismatches, and DLQ backlogs to ensure zero flight-data loss across high-volume schedules.
- API Security & Cloud Architecture: Enforced enterprise-grade security and least-privilege access using AWS IAM, automated KMS encryption key rotations, and API Gateway throttling and JWT/token-based authentication.
- Cost & Performance Optimization: Refactored legacy batch data pipelines into decoupled, event-driven serverless services, reducing API response latencies and slashing cloud infrastructure compute costs by 20%.
- CI/CD & Infrastructure as Code (IaC): Automated multi-stage deployment lifecycles (dev, tst, uat, prd) using GitHub Actions and GitLab CI/CD pipelines; authored modular, reusable Terraform templates adhering to strict cloud security baselines.
- AI-Assisted Development & Productivity: Leveraged enterprise AI tools (Amazon Q Developer, Claude) to accelerate unit test authoring, debug complex distributed traces, automate boilerplate code generation, and explore Model Context Protocol (MCP) integrations for automated tooling.
- Distributed Observability & On-Call Engineering: Configured comprehensive CloudWatch alarms, structured log queries, and Datadog tracing to track unique flight records, isolate downstream service latency spikes, and drive rapid incident resolution (reducing MTTR).

EDUCATION

Meenakshi Sundararajan Engineering College (Anna University), Chennai, India

Bachelor of Engineering in Electronics and Communication Engineering | 2018 – 2022

- CGPA: 8.26 / 10.0

CERTIFICATIONS & RESEARCH

- AWS Certified Cloud Practitioner
- AWS Certified AI Practitioner
- Research Publication: Authored "*Planetary Image Improvisation Using Super-Resolution Generative Adversarial Networks (SRGAN)*" (2020) – applied deep learning techniques to image enhancement and reconstruction.
